Aims & Scope:

The Journal of Stroke & Cerebrovascular Diseases publishes original papers on basic, translational, and clinical science related to the fields of stroke and cerebrovascular diseases. The Journal also features review articles, controversies, methods and technical notes, exceptional case reports and other original articles of special nature. Its editorial mission is to focus on prevention, acute management, and repair of cerebrovascular disease. Clinical papers emphasize medical, surgical, and endovascular aspects of stroke, clinical trials and design, epidemiology, stroke care delivery systems and outcomes, imaging sciences and rehabilitation of stroke. The Journal will be of special interest to specialists involved in caring for patients with cerebrovascular disease, including adult and child neurologists, neurosurgeons, neuro-interventionalists, cardiologists, hospitalists, emergency medicine physicians, stroke rehabilitation experts, and other health care providers.
